During registration with already existing data of a user with an email 'user@domain.com', name, password, and birthday, the registration is successful.

Steps to reproduce:

1. Go to the web application <http://qa.noveogroup.com/>
2. Fill the Name field with "Test Name"
3. Fill the email field with user@domain.com
4. Fill the Password field with: 12345678
5. Repeat the password with: 12345678
6. Fill the Birthday field with: 22/02/2006
7. Press on the "register" button

Expected result: An error message. The user already exists.

Actual result: Registration is successful.

Описание

The 'Repeat password' field allows for a difference of 1 character:

There is successful registration with a password containing 8 characters, but the 'repeat password' field contains either 7 or 9 characters, or it contains 8 characters with 1 character being different.

Steps to reproduce:

1. Go to the web application <http://qa.noveogroup.com/>
2. Fill the Name field with "Test Name"
3. Fill the email field with me@domain.com
4. Fill the Password field with: 12345678
5. repeat the password with: 1234567

6. Fill the Birthday field with: 02/03/2022
7. Press on the "register" button

Expected result: An error message. Repeat password should be equal to Password.

Actual result: Registration is successful.
